Manufactured by:

Available in:
 - 50m rolls and cut lengths
 - Standard width: 3m (folded to 1.5m)

TECHNICAL FEATURES

- Has a knitted, lockstitch pattern, incorporating monofilament and yarns for dimensional stability, tear and fray resistance.
- The pattern gives excellent weft and warp stability, due to throw of the weft yarns across the knitting needles during fabrication of the fabric.
- The pattern design achieves high density coverage with the weft yarns, giving up to 92% UV block out and exceptional water run off properties.
- The fabric is heat set using a stentering process. This process facilitates ease of use for converters.
- Additionally, stentered fabric tensions easier on the final structure and will not sag after installation.

Easy Care & Maintenance

High UV Protection (up to 92%)

Durability & Longevity

Resilient Dimensional Stability

Extreme Strength

Heat Reduction

High Tear Resistance
